### PROFESSIONAL SUMMARY

---

I work as a developer and business intelligence analyst for a medical device distribution company in Johannesburg. Most of what I build sits inside live operations: procurement, inventory, stock movement, stocktaking, receiving and the reporting that management uses to make decisions.

The core of the work is Power Apps and Dataverse for internal applications, Power BI for reporting and forecasting, and Power Automate for the workflows that connect those systems to finance, printing and email. Around that I work with RFID hardware, REST APIs, secure internal web pages and broadcast AV infrastructure.

### KEY SKILLS

---

**Data and BI:** Power BI, DAX, Excel, SQL, Data modelling, Forecasting, Data validation, Reconciliation

**Power Platform:** Power Apps, Power Automate, Dataverse

**Systems and Integration:** REST APIs, JSON, Sage Accounting, PrintNode, HTML, SharePoint, Microsoft Entra ID, Cloudflare Access

**Technical:** RFID, Barcode systems, vMix, NDI, Networking, System testing, Deployment, Troubleshooting

**Development Foundation:** Java, SQL, Android development, HTML, CSS

### EXPERIENCE

---

#### Developer / Business Intelligence

Virtumed (Pty) Ltd, Johannesburg, Gauteng | April 2024 to Present

- Design, develop and maintain internal systems for procurement, inventory, stock movement, stocktaking, receiving and reporting using Power Apps, Power Automate and Dataverse.
- Build Power BI dashboards and reports covering sales, inventory, stock risk, representative performance, locations, product groups and management reporting.
- Use historical company data for forecasting and comparative analysis.
- Use Excel and business system data for analysis, validation and reconciliation.
- Build Power Automate workflows to automate repetitive processes.
- Integrated Sage Accounting with Power Automate and PrintNode for delivery note processing and printing.
- Built an RFID stocktake system using handheld RFID scanners, Power Apps, Dataverse and Power Automate.
- Developed scanner input functionality for mobile RFID capture.
- Created automated HTML email and printable stocktake reports.
- Work with serialised medical device inventory, stock movements, receiving, replenishment, stocktakes, discrepancies and location control.
- Support purchasing and stock provisioning through purchase order validation, supplier and product checks, replenishment requirements and stock analysis.
- Develop secure internal web pages using HTML, Cloudflare Access, Cloudflare Zero Trust and Microsoft Entra authentication.
- Work with finance, stock, sales, logistics and management to gather requirements and build internal systems.
- Test, deploy, troubleshoot and support internal systems.
- Research and evaluate technical systems, equipment and vendor proposals.
- Work with broadcast and AV infrastructure for medical events.

#### Escape Room Manager

Hashtag Escape, Johannesburg, Gauteng | February 2022 to March 2024

- Managed daily escape room operations and bookings.
- Managed and troubleshoot room equipment, software and technical systems.
- Diagnosed faults between sessions.
- Supported customers and daily operations.

## Waiter

The Fat Ginger, Johannesburg, Gauteng | June 2021 to January 2022

- Customer service and daily floor operations in a busy restaurant.

## EDUCATION

---

### Diploma in Systems Development

Boston City Campus | 2021 to 2023 | Certificate received 2024 | NQF Level 6

**Relevant study:** Java, Database Programming, SQL, Android Application Development, Systems Analysis and Design, Workflow Management, Software Testing, Technical Systems and Support, Systems Development Project Management

### National Senior Certificate

Jeppe High School for Boys | 2016 to 2020

## SELECTED WORK

---

**RFID Stocktake and Inventory System:** Handheld RFID scanning into Power Apps and Dataverse, with confirmed, missing and unexpected stock reconciled in one pass.

**Business Intelligence and Forecasting:** Power BI reporting across sales, inventory, representatives, locations and groups, with forecasting from historical data.

**Sage and Print Automation:** Power Automate moving operational delivery information into Sage Accounting and out to a physical printer through PrintNode.

**Secure Internal Operations Tools:** Internal web pages for stock movement, receiving and business workflows, published behind Cloudflare Access and Microsoft Entra.

**Cross Site Medical Broadcast:** Low latency audiovisual communication between doctors at separate clinical sites during medical cases.
